

Label location and size photograph

The full label with warning has not been placed on the device.

The client intends to only place a small label on the device.

Therefore the client is requesting that the warning be placed in the manual (as per Section 15.19(a)(5)) as a large label will not last long on the product as the Choker will have a very hard life as it will be dropped from great heights, be buried in soil, water and really get a hammering.
